## A 'ONE STOP SHOP' FOR THE DELIVERY OF SOLAR POWER

Boston Renewables offers a turnkey service for the design, installation and maintenance of solar PV arrays.

Providing an in-house service for obtaining all statutory consents (eg; grid connection and local authority planning), Boston Renewables is truly a 'one stop shop' for the delivery of solar power to our region's commercial sector.

Long-standing relationships with national wholesalers allows Boston Renewables to procure the very best equipment for its clients. To date, the team has never had a claim against a solar panel warranty and all of its arrays have been proven to perform in line with specialist software modelling.

## A SMALL BUT EFFECTIVE TEAM

Boston Renewables is made up of a small but effective team and, while it does engage with sub-contractors, all work is carried out under the team's supervision. Boston Renewables has found recruitment difficult in the region, mainly due to electrically skilled labour being pulled in the offshore wind industry. Despite this, it continues to thrive and service its clients to a high standard.

## POWERING THE FUTURE

The future for solar power looks promising. The basic figures for solar installed in the SME sector are that electricity can be generated on site by solar for less than 10p per unit and this makes very meaningful savings against grid supplied electricity that is currently priced in excess of 35p per unit.

## ACCREDITATIONS AND RECOMMENDATIONS

Boston Renewables is proud to hold the 9001, 14001 and 45001 ISO accreditations. Audited by Lloyds Register, the team constantly strives to improve what it does and how it does it. The company also holds the CHAS accreditation.

Boston Renewables' largest project has been the installation of a 5MW array at Castle Hill Hospital. This array is the largest of its kind in the UK that is directly linked to an NHS facility. 11,000 solar panels provide in excess of 5 million kilowatt hours per year to power medical equipment, lighting and air conditioning and in the hospital.

Boston Renewables' customers are always delighted when their new solar arrays are commissioned and the team enjoys a near endless stream of recommendations to new clients as a result.
